

Crime Analysis Report Criminal Justice Information Center January, 1998

Here is the second edition of the Crime Analysis Report! The first edition, which focused on demographic information, received much positive feedback. The reports were sent to all MSP District Commanders and Post Commanders, Criminal Investigation Divisions and Teams, County Sheriffs, MSP Executive Council members, and MSP Crime Analysis Steering Committee members. This edition contains information about violent crime, including rates, trends in the past five years, and projections for how these trends are likely to move in the future. The data used in this report comes from the Michigan Uniform Crime Reports, which includes MICR reporting. Questions or comments about this report can be directed to Ms. Amy Alderman in the Criminal Justice Information Center of MSP by telephone at (517)322-6025 or by email.

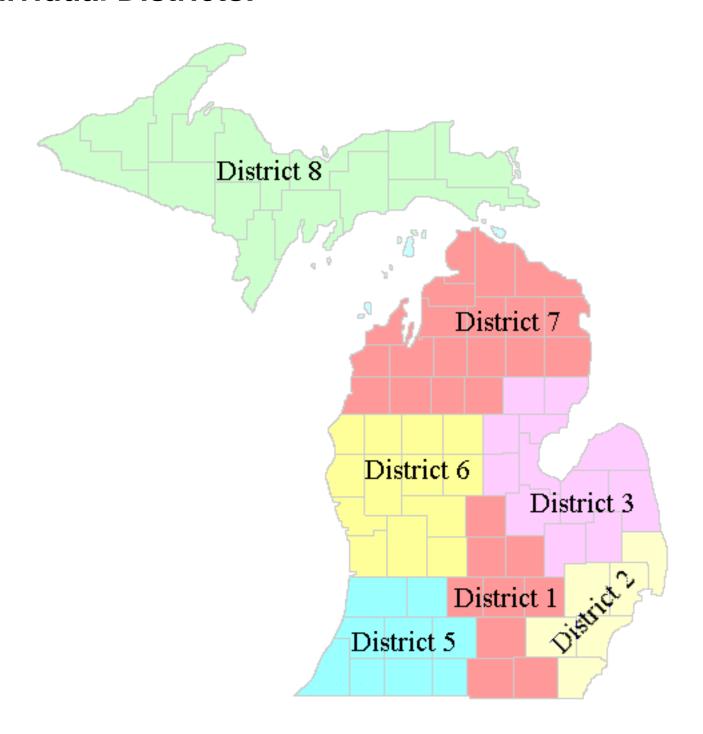

The projections were calculated using a statistical formula called Trend Line Analysis. This calculation uses actual data from past years to determine a correlation and a standard error of the estimate, and predict a range that has a 68% likelihood of occurring. The number provided with the range is the midpoint, and can be used to get an idea of what the range represents.

The rates in the report show the number of crimes based on a population of 100,000, even in counties with populations under 100,000. This means that such a county is likely to have a rate that is a larger number than the actual number of crimes. Rates are determined by dividing the number of crimes by the population, then multiplying by 100,000. The rates are all based on 100,000 so that they are comparable. Rates allow for comparison because they remove the population differences. The rates in <u>Eighth District</u>, for example, are comparable to <u>Second District</u>, even though the populations of these areas are much different. The violent crime rate of 796.41 per 100,000 in <u>Second District</u> can be compared to the rate of 131.15 per 100,000 in <u>Eighth District</u>, and population is not a reason for the difference.

Report for the Entire State

Individual Districts:

District Eight Crime Analysis Report Criminal Justice Information Center January, 1998

County Information:

- Chippewa County reported the largest five year decrease in rape rate for Eighth District
- Iron County reported the largest five year increase in rape rate for Eighth District
- Keweenaw County reported the lowest violent crime rate in the state (of 83 counties) in 1992, but reported the 12th highest violent crime rate in 1996 (controlling for population)
- Alger County reported the 34th highest violent crime rate in the state (of 83 counties) in 1992, but reported the 18th highest violent crime rate in 1996

District Information:

- Eighth District makes up 3.29% of the state population, and reported less than one percent of the violent crime in 1996
- Eighth District reported the lowest rates (controlling for population) for all types of violent crime in 1996 among the seven districts
- Five of the ten Michigan counties with the lowest reported violent crime rates for 1996 are in Eighth District (Baraga, Gogebic, Delta, Chippewa, Dickinson)
- Six of the ten least populated counties in Michigan are in Eighth District

Rates are calculated by dividing the number of crimes by the population, then multiplying by 100,000. Certain percentages are not calculable because rate cannot be divided by zero.

Percentages show the five year trend in crime rate. Crime rates control for differences in population, therefore the counties are comparable. Crime rates are determined by dividing the number of crimes by the population, then multiplying by 100,000. Murder chart does not include counties with zero murders. Prepared by Amy Higgins, Crime Analyst (517) 322-6025, or AldermaA@state.mi.us.

District Two Crime Analysis Report Criminal Justice Information Center January, 1998

County Information

- Wayne County reported a murder rate of 22.77 per 100,000 in 1996, 5.3 times higher than the second highest in the district
- Oakland County reported the lowest rape rate in Second District and the seventh lowest in the state for 1996 (26.01 per 100,000)
- Within Second District, Monroe County reported the highest rape rate for 1992 (83.83 per 100,000), but also reported the greatest decrease between 1992 and 1996 (-60.68%)
- Wayne County reported a robbery rate that was more than four times higher than the second highest robbery rate in Second District both in 1992 and 1996

District Information:

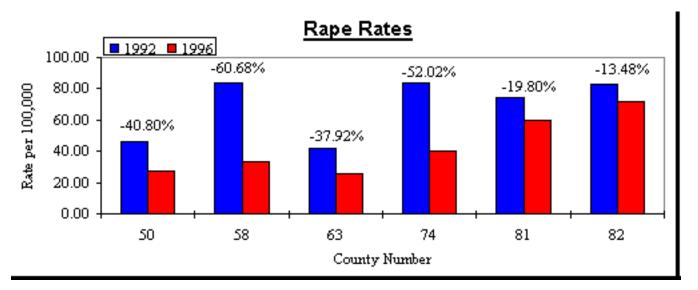

- Second District makes up 47.43% of the state population, and reported 62.39% of the violent crime in 1996
- Second District reported a murder rate of 11.37 per 100,000 in 1996, 1.8 times higher than any other district
- Second District reported the lowest rape rate in 1992 (66.73 per 100,000)
- Second District reported the highest robbery rate in the state both in 1992 and 1996, but also reported the largest five year rate decrease (-25.04%)
- Second District reported the highest overall violent crime rate in 1992 (974.32 per 100,000) and in 1996 (796.41 per 100,000)
- Violent crime in Second District is projected to continue decreasing in 1997 and 1998

State of Michigan Crime Analysis Report Criminal Justice Information Center January, 1998

District Information:

- Even when controlling for population differences, <u>Second District</u> has a murder rate for 1996 that is 1.8 times higher than any other district
- Even when controlling for population differences, <u>Second District</u> has a robbery rate for 1996 that is 1.9 times higher than any other district
- The rape rate is much more evenly distributed across the districts than the rates for other violent crimes
- The robbery rate has increased 5.47% in First District over the last five years, and is the only district violent crime rate that increased
- First, Fifth, and Eighth Districts all had five year decreases of more than 30% in overall violent crime

Statewide Information:

- In the last five years, the overall violent crime rate has decreased -21.74%, even while the state population has increased 2.73%
- All violent crime rate categories for the state have decreased in the last five years, murder rate -27.54%, rape rate -33.82%, robbery rate -23.52%, aggravated assault rate -18.65%
- Statewide, all violent crime is projected to continue decreasing for 1997 and 1998
- Statewide, aggravated assault made up 59.5% of all violent crime in 1992 and 61.86% of all violent crime in 1996

	* Seventh District cannot be projected because violent crime has not followed a statistically significant trend over the past five years $(r = -0.313)$.										

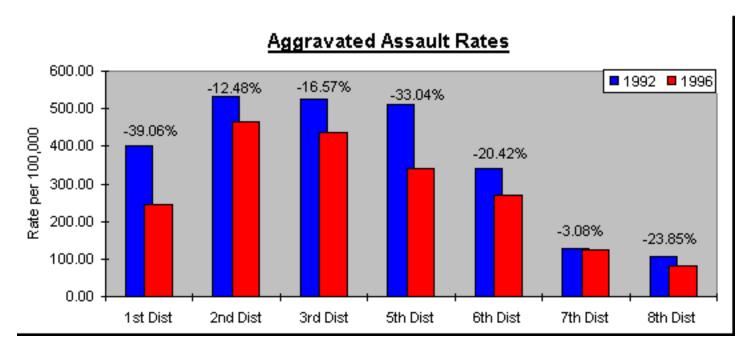

Projections are calculated with Trend Analysis using actual data from 1992-1996. Projected ranges have a 68% level of certainty, and assume that the established trend has continued.

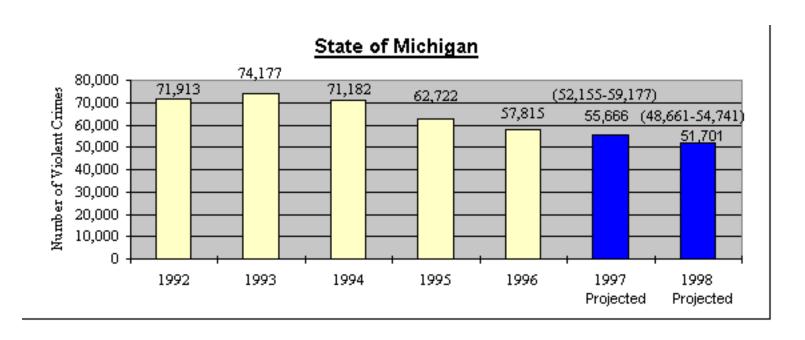

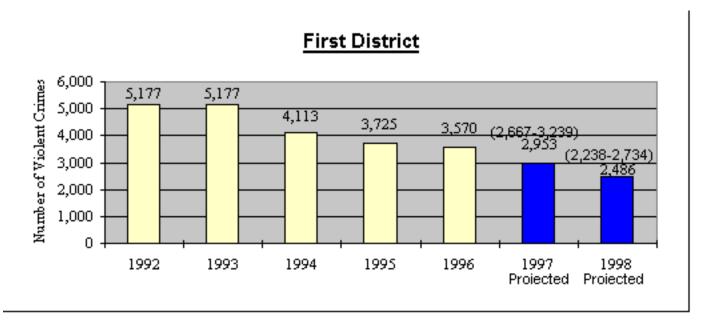

Percentages show the five year trend in crime rate. Crime rates control differences in population, therefore the districts are comparable. Crime rates are determined by dividing the number of crimes by the population, then multiplying by 100,000. Percentage changes are determined by subtracting the number of crimes in 1992 from the number in 1996, then dividing the total by the number of crimes in 1992. Prepared by Amy Alderman, Crime Analyst (517) 322-6025, email: AldermaA@state.mi.us

District Seven Crime Analysis Report Criminal Justice Information Center January, 1998

County Information:

- Presque Isle, Oscoda, and Leelanau Counties are among the ten lowest violent crime rate counties in Michigan for 1996
- Kalkaska County reported the highest rape rate in Michigan for 1996
- Wexford County reported the highest robbery rate in Seventh District, and the 20th highest in the state (of 83 counties) for 1996
- Roscommon County reported the highest overall violent crime rate in Seventh District, and the 21st highest in the state for 1996
- Presque Isle County reported the lowest overall violent crime rate in Seventh
 District, and the fifth lowest in the state for 1996

District Information:

- Seventh District is home to 4.26% of the state population, and reported 1.46% of the violent crime in 1996
- Seventh District reported the smallest five year decrease in overall violent crime rate of the seven districts (-11.21%)
- Seventh District reported the highest rape rate in Michigan for 1996
- Seventh District reported the second lowest murder, robbery, aggravated assault, and overall violent crime rates in 1996
- Six counties in Seventh District are among the twelve highest rape rates reported for 1996 (Kalkaska, Emmet, Manistee, Roscommon, Otsego, Missaukee)

District Six Crime Analysis Report Criminal Justice Information Center January, 1998

County Information:

- Ionia County reported the largest five year decrease in rape rate for Sixth District (-72.07%)
- Kent County reported the only five year increase in murder rate in Sixth District (+12.62%)
- Lake County has the seventh smallest population among the 83 counties in Michigan, but reported the second highest rape rate and the ninth highest aggravated assault rate in 1996
- Clare and Mecosta Counties reported the only five year increases for rape rate in Sixth District
- Clare and Mecosta Counties both reported five year increases in overall violent crime rates (Clare +16.80%, Mecosta +47.77%)
- Osceola County reported the lowest overall violent crime rate for 1996 in Sixth District, and the 12th lowest in the state

District Information:

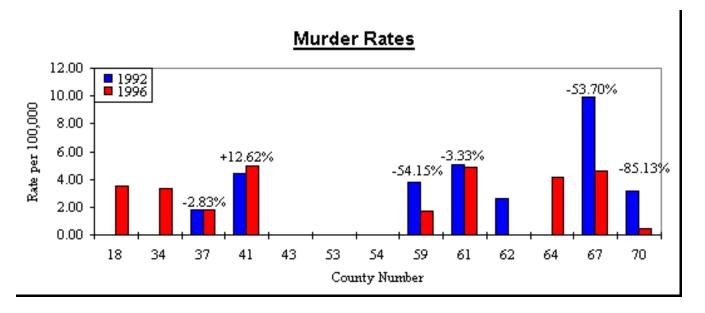

- Sixth District makes up 13.26% of the state population, and reported 8.81% of the violent crime in 1996
- Sixth District reported the largest five year decrease in rape rate among the seven districts (-48.25%)
- Of the seven districts, Sixth District is the second most populated district in Michigan, and reported the fourth highest violent crime rate in 1996
- Sixth District's population increased 6.48% between 1992 and 1996, while the reported number of murders was the same (42), resulting in a rate decrease of -6.08%
- Three counties in Sixth District are among the ten highest reported violent crime rate counties in Michigan for 1996 (Kent, Lake, and Muskegon)

District Five Crime Analysis Report Criminal Justice Information Center January, 1998

County Information:

- Calhoun County reported the fourth highest murder rate in the state (of 83 counties) for 1996
- Calhoun, Kalamazoo, and Berrien Counties are among the ten highest counties in Michigan for robbery rate, aggravated assault rate, and overall violent crime rate in both 1992 and 1996
- Branch County reported the largest five year decrease in violent crime rate for Fifth District (-67.25%)
- Allegan County reported the only robbery rate increase in Fifth District between 1992 and 1996

District Information:

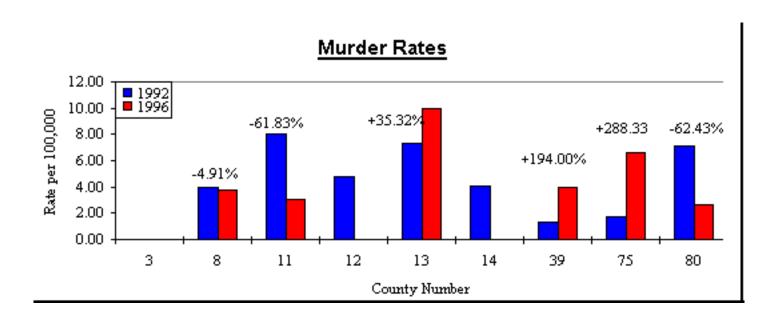

- Fifth District makes up 9.52% of the state population, and reported 7.66% of the violent crime in 1996
- Fifth District reported the second highest decrease in violent crime rate of the seven districts between 1992 and 1996 (-32.83%)
- Fifth District reported the third highest rates among the seven districts in all types of violent crime for 1996

Rates are calculated by dividing the number of crimes by the population, then multiplying by 100,000. Certain percentages are not calculable because rate cannot be divided by zero.

Percentages show the five year trend in crime rate. Crime rates control for differences in population, therefore the counties are comparable. Crime rates are determined by dividing the number of crimes by the population, then multiplying by 100,000. Percentage changes are determined by subtracting the number of in 1992 from the number in 1996, then dividing the total by the number of crimes in 1992. Prepared by Amy Alderman, Crime Analyst (517) 322-6025, or AldermaA@state.mi.us.
